

GuardPointPro - How to print the card number as a bar-code

1. Open the Cardholder screen of GPP and press on the Layout button (visible only if the Badge Printing Module is present)
2. The Layout window is displayed. Click on the Design View.
3. Drag and drop a Barcode control in your layout and select "Code" as DataField Property.

4. Select File>Save and save your layout in the Reports>BP folder (ex. "Barcode.rpx").

Last name		First name	
<input type="text" value="Adjani"/>		<input type="text" value="Isabelle"/>	
Number	Type	Company	
<input type="text"/>	<input type="text" value="Employee"/>	<input type="text"/>	
		<input type="text" value="barcode.rpx"/>	

5. Go to Preview to see you generated barcode
