

GuardPoint Pro Lite Access Control Software

GuardPoint Pro Lite is a sophisticated, yet user friendly access control software package that centralises security requirements within smaller installations. Like GuardPoint Pro, it comes packed with a wealth of features, yet is simple to commission and extremely easy to use

Key Features

- Unlimited access levels
- Time and attendance reporting
- Global functionality
- Roll call reporting
- Compatible with IC1000+ and IC1000+IP
- Up to 2000 badges
- Multiple language support
- Alarm control and graphical maps
- Easily upgradable to GuardPoint Pro

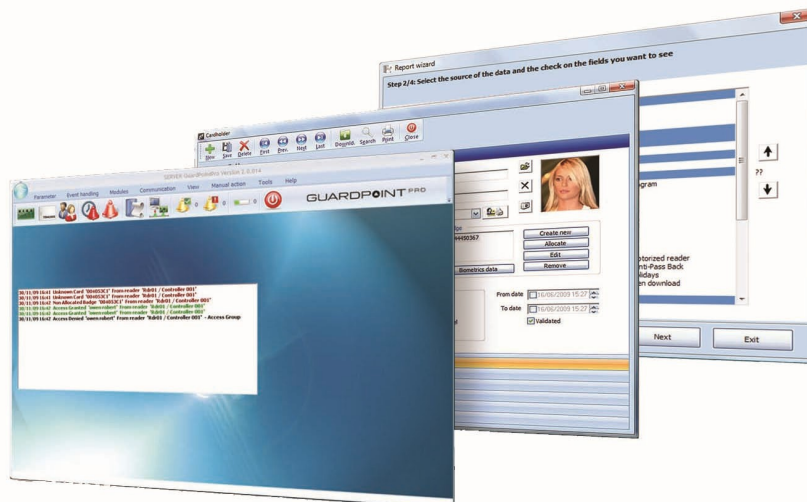

GuardPoint Pro Lite can communicate with our IC1000+ range of controllers, and can store up to 2000 individual cardholders, produce roll calls, and has an in-built Time and Attendance feature that allows you to produce extensive reports based on the movements and hours worked by your cardholders.

Perfect for Small Installations. With its 8 controller capacity and 2000 badge storage, GuardPoint Pro Lite is designed to handle smaller installations effortlessly, and if you need to expand beyond this, an upgrade to GuardPoint Pro is simplicity itself

Time & Attendance - GuardPoint Pro Lite incorporates a full Time & Attendance feature. With this, the user will be able to view and export reports showing a breakdown of the time(s) badgeholders have spent on site, including total times for each day.

Alarm Management - Alarms reported in the system immediately show in red, with corresponding instructions, flashing icons and audio, and will continue whilst they await acknowledgment and confirmation.

Easy Upgrade - Whilst the GuardPoint Pro Lite software is designed specifically as a solution to smaller sites, upgrading has never been easier. If you need to change to the full version we can send you a new dongle ID number, just copy it to your PC and your Lite version will become Pro.

GuardPoint Pro Lite Access Control Software
