

## UBK-P

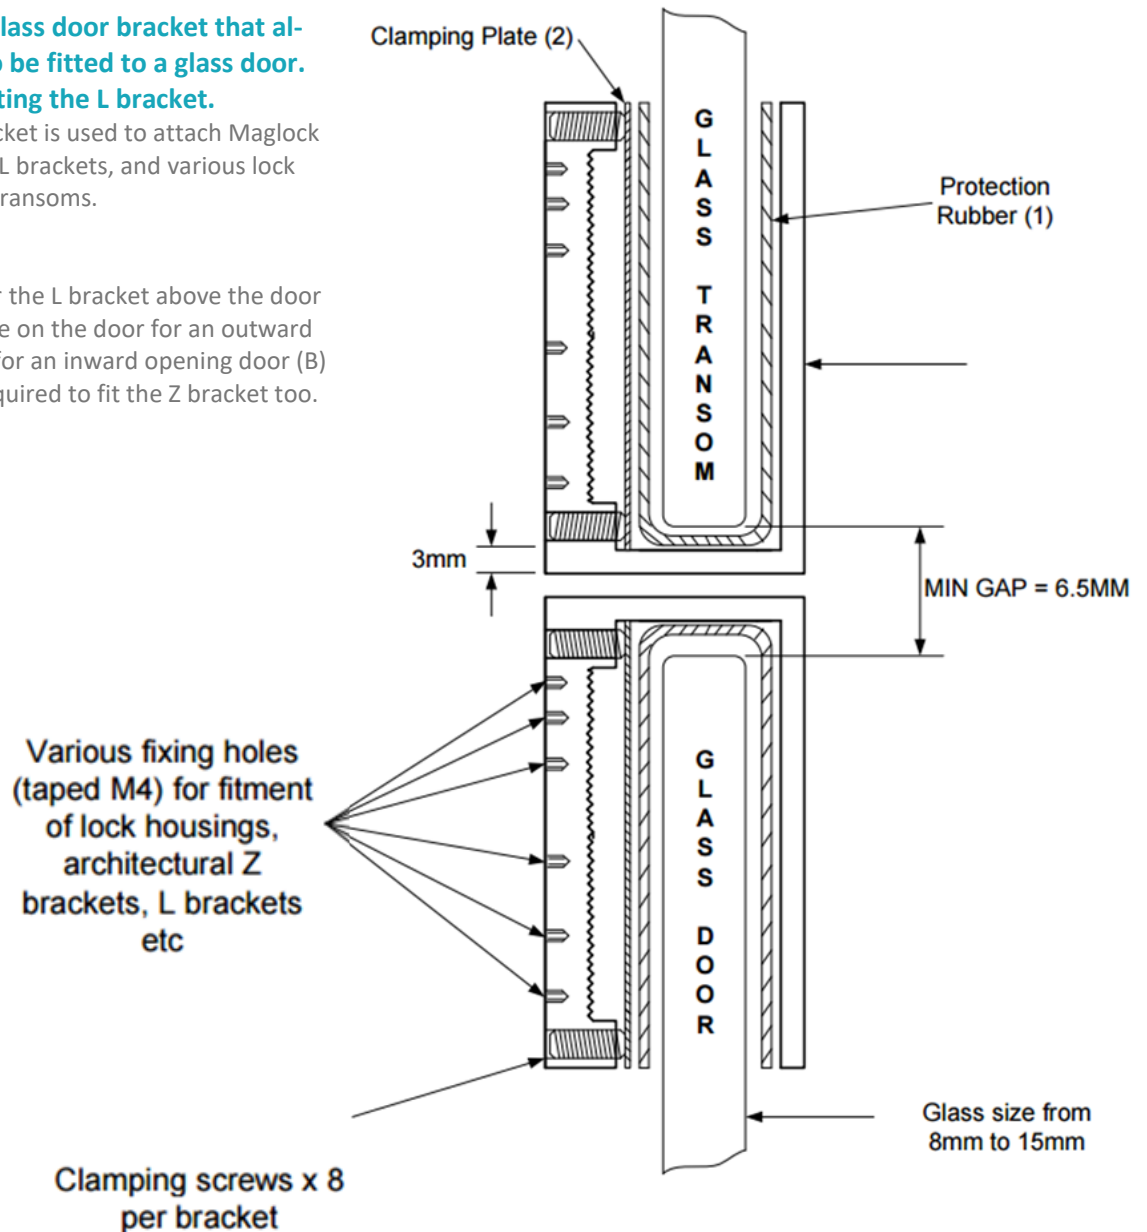

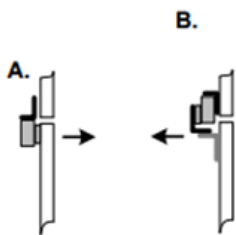

# Universal Glass Door Bracket for L Bracket

**The UBK-P is a universal glass door bracket that allows an armature plate to be fitted to a glass door. This is useful when mounting the L bracket.**

This universal glass door bracket is used to attach Maglock L brackets, Architectural Z & L brackets, and various lock housings to glass doors and transoms.

For example:

The UBK-P would be used for the L bracket above the door and a UBK-U for the armature on the door for an outward opening door (A). However, for an inward opening door (B) a second UBK-P would be required to fit the Z bracket too.

### UBK-P Fitting Instructions

- Place the rubber sheet over the top of the door, checking the placement—this protects the glass from damage
- The rubber sheet should be adhered to the door to make installation easier
- Use the self-adhesive on the clamping plate and fix to rubber as per diagram
- The bracket can now be placed over the rubber and plate and clamped into position using the 8 grub screws
- The bracket is now ready to fix accessories too
