

ES-RDR

Energy Saving Key Card Switch

The Sensor Energy Saving switch is a card operated electrical switch allowing on / off control using a proximity card.

Key Features

- Powered from mains
- Integrates into bigger access control system
- LED Indicator
- Compatible with standard Single gang back box
- Back Box depth—35mm
- Works with different technologies

This product is ideal to use where a BMS solution is required and great for energy saving measure's and new green rules being introduced.

Technical Specification

Physical

ES-RDR 87(H) x 86(W) x 42(D)mm

Environmental

Operating Temperatures -10°C to +55°C

Electrical

Power Supply Maximum load 30A 230V

Operational

Read Range Insertion

Part Numbers

SP-ES-RDR Sensor Prox Proximity Format Energy Saving Switch

MF-ES-RDR Sensor Mifare Format Energy Saving Switch
