Advanced Global Reflex
GuardPoint 10 Module

The Global reflex module allows you to customize the access control system to your own individual needs. GuardPoint 10 provides a user friendly Drag and drop interface that allows you to create custom cause and effect actions with ease.

Complex actions can also be created using "AND" and "OR" scenarios.

Simple scenarios could be: open all the doors after an alarm and send an email, or Lock all the doors after an alarm has been confirmed.

Some example triggers in GuardPoint 10

- Access Granted/Denied
- Alarm triggered
- Tamper and power cut signal
- Schedule

Some example actions in GuardPoint 10

- Activate Relays
- Generate reports
- Send emails
- Run external applications
